WORKSHOP GOALS

This 1-day technical workshop will enable participants to:

- Learn about new and revised construction erosion control technical standards which have replaced the Wisconsin Construction Site BMP Handbook.
- Understand how technical standards should be applied under different types of projects.
- Understand responsibilities from design through implementation and enforcement.
- Understand soil loss prediction techniques and be aware of tools being developed.
- Learn about new DNR and Department of Commerce Notices of Intent (NOI).
- Provide feedback on NOI.

Instructors will include members of the technical standards development committee comprised of DNR, Commerce, DOT, local government and private sector experts. Vendors of erosion control products and services will be on hand during the day.

WHEN & WHERE

Participants choose one of the following sessions.

March 27 Wisconsin Dells (Wintergreen Conf. Center)
April 10 Rice Lake (WITC Conference Center)
April 13 Green Bay (Rock Garden/Comfort Suites)
April 18 Waukesha (Country Springs Inn)

WHO SHOULD ATTEND?

- Municipal staff who oversee, inspect or design construction erosion control projects.
- Consultants who plan and design construction projects.
- Developers and contractors responsible for construction projects.
- State agency staff responsible for construction erosion control oversight, review and inspection.

Participants should have a basic knowledge of NR 151 construction performance standards and construction erosion control technical standards which are available at runoffinfo.uwex.edu. Follow the links to Urban Stormwater, Standards and Technical Assistance.
